PRODUCT GUIDE PG006

Wastewater and Effluent Treatment Products

Global Advantech's innovative biostimulant products improve the biological performance of wastewater and effluent treatment plant.

NATURAL BIOSTIMULANTS FOR WASTEWATER AND EFFLUENT TREATMENT

For more details, please refer to Technology Data Sheet: TDS820 Natural Biostimulant Technology

Code	Product	Pollutants	Applications
WT950	**NATURAL BIOSTIMULANT DRAIN + GREASE TRAP CLEANER**	Vegetable oils + greases, animal fats + greases	• Prevent the build-up of deposits of fats, oils and greases in drains and grease traps • Biostimulant • Injection (automatic dosing) into drains, prior to grease traps
WT951	**NATURAL BIOSTIMULANT WASTEWATER + EFFLUENT TREATMENT**	Vegetable + greases, animal fats + greases, mineral oils + greases, fuel oils, BTEX + additives, aliphatic + aromatic hydrocarbons, organic solvents	• Improve the performance of aerobic digesters and biological filters in wastewater treatment plant • Stimulate natural micro-organisms in oil interceptors and effluent retention tanks to increase the rate of biodegradation and reduce maintenance requirements • Biostimulant • Injection (automatic dosing), manual dosing
WT952	**NATURAL BIOSTIMULANT EFFLUENT TREATMENT**	Mineral oils + greases, fuel oils, BTEX + additives, aliphatic + aromatic hydrocarbons, polyaromatic hydrocarbons, phenols, organic solvents	• Stimulate the natural micro-organisms in effluent retention tanks, ships' bilges, etc., to increase the rate of biodegradation and reduce pump out requirements • Biostimulant • Injection (automatic dosing), manual dosing

AIR-BIOFILTER TREATMENT

Code	Product	Pollutants	Applications
WT960	**AIR—BIOFILTER STIMULANT**	Vegetable oils + greases, animal fats + greases, aliphatic + aromatic hydrocarbons, organic compounds – aldehydes, ketones, alcohols.	• Improve the performance of biological air-filters to degrade organic compounds in exhaust air streams • Biostimulant • Spray
