

Natural Biostimulant Wastewater and Effluent Treatment Product Guide

WASTEWATER AND EFFLUENT TREATMENT

Product	Code	Pollutants	Applications
NATURAL BIOSTIMULANT DRAIN AND GREASE TRAP CLEANER	WE950	Vegetable fats, oils, greases Animal fats, oils and greases	To prevent the build of deposits of fats, oils and greases in drains and greases traps <i>Injection (automatic dosing) into drains, prior to grease traps</i>
NATURAL BIOSTIMULANT WASTEWATER TREATMENT	WE951	Vegetable fats, oils, greases Animal fats, oils and greases	To improve the performance of biological filters in wastewater treatment plant <i>Injection, manual dosing</i>
NATURAL BIOSTIMULANT EFFLUENT TREATMENT	WE952	Vegetable fats, oils, greases Animal fats, oils and greases Mineral oils and greases BTEX + additives Hydrocarbons Organic solvents	To improve the performance of aerobic digesters and biological filters in wastewater treatment plant To stimulate natural micro-organisms in oil interceptors and effluent retention tanks to increase the rate of biodegradation and reduce maintenance requirements <i>Injection, manual dosing</i>
NATURAL BIOSTIMULANT EFFLUENT TREATMENT	WE953	Mineral oils and greases Plant oils and greases Fuel oils Hydrocarbons Phenols Organic solvents	To improve the performance of aerobic digesters and biological filters in wastewater treatment plant To stimulate the natural micro-organisms in effluent retention tanks, ships' bilges, etc., to increase the rate of biodegradation and reduce pump out requirements <i>Injection, manual dosing</i>

AIR-BIOFILTER TREATMENT

Product	Code	Pollutants	Applications
AIR—BIOFILTER STIMULANT	WE958	Vegetable fats, oils, greases Animal fats, oils and greases Hydrocarbons Organic compounds	To improve the performance of air-filters to degrade organic compounds in air streams <i>Spray</i>
